

# **Dr Carmen Letton**

## **Non Executive Director, Principal Unicus**

Carmen is a mining engineer and mineral economist with over 35 years of global mining experience in more than 10 world class and tier one assets and has a diverse background in senior leadership roles in operations, business improvement, operational excellence, major mergers and acquisitions and corporate strategy development.

She has a particular technical expertise in optimisation and value maximisation of open pit and underground mines across multiple commodities and the many stages of asset development and spent over 10 years leading the turnaround of mining portfolios and individual assets.

Most recently Carmen has played key roles on the Board of Directors of international mining companies having previously worked at Anglo American, BHP, Rio Tinto, Newmont, Newcrest and Alcoa.

Carmen was selected as one of the “100 Global Inspirational Women in Mining” in 2016 and 2018 by Women in Mining UK.

She currently sits on the boards of CanaGold, Technology Metals Australia and Magnetite Mines.

She has a PhD in Mineral Economics; a Bachelor of Engineering (Hon) (Mining) and is Graduate of the AICD.
