

METPLANT
CONFERENCE 2023

29th – 31st May 2023

Perth and online

ausimm.com/conferences-and-events/metplant/

Janine Herzig
MetPlant Convenor, FAusIMM (CP)

Crown Perth, Burswood

MetPlant vs MillOps – What is the difference?

Lots of synergies. Work well on a back to back basis.

MetPlant - World's best practice in Metallurgical Plant Design and Operating Strategies

- a snapshot of best practice & innovation
- broad range of disciplines
- discuss and review developments in metallurgical plant design
- optimisation of operations, maintenance
- process control, closure strategies

MillOps - Changing themes

- operations, a collection of “how-to” papers

Thanks to our Trendsetting Early Partners!

Principal Sponsor

Metso:Outotec

Principal Sponsor and Innovation Partner

Thanks to our early partners & supporters

Thanks to our early sponsors

Sustainable Minerals Institute

Call for Abstracts opens soon

Abstracts will be subject to peer review.

Selection criteria include:

- relevance to the conference theme
- accuracy and originality of ideas
- significance of the contribution
- quality of presentation
- collaborative papers between operations and service providers/vendors/engineering firms are encouraged

Abstract themes

MetPlant continues to feature the traditional themes of preconcentration, comminution, flotation, hydromet, pyromet, design, process control, tailings management, and thickening.

We also welcome some new topical themes including, such as:

- process safety and ESG in autonomous operations
- modularisation of plants
- acid integrity remediation
- issues with brownfields projects
- carbon footprint reductions
- project management, social performance and
- designing for renewable energy – e.g. increasing use of solar and other renewables.
