

MOLTEN 2024

ISASMELT™ Test Hub Competition

ENTER for your chance to win **USD\$93,000** worth of pilot testing for your pyrometallurgical idea!

The transition to alternative energy sources is spurring an increased demand for critical and energy metals. Simultaneously, there's a growing emphasis on embracing a circular economy model, leading to heightened recycling efforts. This dynamic setting offers significant opportunities for those in the pyrometallurgical field to play a pivotal role in this transformative journey.

However, addressing the urgent need for innovation in metallurgical plants, mineral processing companies, engineering firms, consultancies, and academic institutions demands substantial investments of time, effort, and financial resources. This is where you step in - we're inviting you to share your pyrometallurgical ideas that can aid the transition to sustainable technologies and the chance to win the funding to do so!

All you have to do is follow these 3 easy steps:

1

Register for conference

Register as a delegate for MOLTEN 2024, for the 12th International Conference of Molten Slags, Fluxes and Salts held in Brisbane, 17 - 19 June 2024.

Only submissions from registered conference attendees will be considered for the Main Prize, valued at up to \$USD93,000.

[REGISTER HERE](#)**2**

Answer 5 simple questions

1. What materials do you propose to test?
2. What products do you believe can be produced?
3. What factors do you want to test for?
4. What outcomes would make for a 'successful' conclusion?
5. How does your idea contribute to the transition to a circular economy model?

3

Submit best ideas to win!

Once your ready, submit your entry based on the 5 questions and go into the running of winning our Main Prize.

\$USD93,000 worth of pilot testing for your pyrometallurgical idea at Glencore Technology's newly built ISASMELT™ Test Hub at the University of Queensland.
