

Business Optimisation for Mining

ASSOCIATE CERTIFICATE

Explore value maximisation and de-risking mining projects through good strategic decision making and high performance, exploring both key drivers of value in mining projects as well as understanding of better strategic risk management.

Identify strategies for success when facing commodity price shifts, exploration upside, squeezed margins and myriad other market and operational factors

Gain actionable insights into developing an optimised strategy for a mining project and the performance measures that can be put in place to align the operations with strategic intent so the business goals are achieved – with guidance on balancing the trade-offs between the long-term business goals and short-term production targets.

PD hours
20 hours

Delivery
100% online

Duration
5 weeks

Harness strategy optimisation, cut-off grade expertise and identification of optimal performance measures to maximise mine project value while reducing risk.

Learn practical knowledge that you can apply immediately to enhance your project's outcomes:

- project evaluation basics
- strategy optimisation
- cut-off grade theory and practice
- key performance measures and reporting
- recent developments in new technologies and innovations
- how to conduct benchmarking and implement continuous improvements
