

Applicants for admission or transfer to the grade of Fellow must have held a senior management or executive level position for at least five years, or have had at least 15 years senior experience including some major personal accomplishment.

This is determined through consideration of the professional knowledge and experience gained by the applicants and the outcomes achieved by them through the application of that knowledge and experience.

This implies an advanced level of knowledge and experience and the achievement of substantial outcomes, outcomes which are of major importance to corporate decision makers, whether employer or client.

Factors taken into consideration when assessing an applicant's experience:

- Leadership and decision-making at senior management or executive level
- Responsibility for substantial economic inputs and outcomes
- Leadership of professional teams
- Professional advice and evaluation which is relied upon to achieve substantial outcomes
- Substantial contributions to the professional knowledge base
- Substantial contributions to the education and development of professionals.

All applicants for the grade of Fellow are required to provide a statement addressing the factors above. This statement will be considered with all other supporting information in the assessment of an applicant's senior experience.
