IRON ORE 2021 | CONTENTS

Agglomerate bonding phase advances

Development of a cold bonding technology to high-grade iron ore concentrate 2
J Caron, M Athayde, F Lavoie and R Joyce

Ancient to modern ironmaking – examining the effect on the behaviour of phosphorus and other impurities in iron ore by doping with calcium oxalate ($CaC_2O_4.H_2O$) 13
S Hapugoda, V Nunna, H Han, M I Pownceby and L Lu

Characterisation of SFCA phases in iron ore sinter by combined optical microscopy and electron probe microanalysis (EPMA) 32
S Hapugoda, L Lu, E Donskoi, M I Pownceby and H Han

Influence of the occurrence state of Al_2O_3 on the metallurgical performance of product sinter 55
J Pan, C C Yang, D Q Zhu, Z Q Guo, Q H Li and X Wang

Alternative fuel sources for ironmaking

Replacement of Pulverised Coal Injection (PCI) with hydrogen and its impact on blast furnace internal conditions 65
N Barrett, P Zulli, D O'Dea, S Mitra and T Honeyands

Utilisation of energy sources other than coke in the sintering process 72
Y Iwami, T Higuchi, K Takehara, S Fujiwara and K Fukada

Fundamental study for biomass char utilisation at sintering process in view of combustion property 87
M Matsumura, R Muroi and T Takayama

Acceleration of the oxidation reaction of iron-bearing materials by using biomass char in the sintering bed 94
T Murakami, Y Konno, D Maruoka and E Kasai

Exploration and geology

Exploration advances – MinEx CRC's mission 99
A C Bailey and D Giles

A new look at detrital iron deposit geology of the Hamersley Province of Western Australia 108
J M F Clout, G Plummer and C Simpson

Preliminary 3D geological model and structural analysis of the Neoarchean to Palaeoproterozoic Hamersley Basin, Pilbara, Western Australia 128
A Piechocka, M Jessell, D McB Martin, M Lindsay and E Ramanaidou

Maximising resource utilisation in South Africa – the BIF story 138
A Singh and C Da Corte

Geophysics

Challenges in designing a magnetic resonance logging-while-drilling tool for iron ore exploration 160
K T O'Neill, S Mukkisa, M L Johns and T A J Hopper

Improving drill productivity and delivering better geophysical data faster 170
D Palmer, T A J Hopper, K-O Ott and S Mukkisa

Geophysical blasthole sampling 176
C Simpson and J Market

Geophysical log applications to geological and geotechnical assessment 193
B Zhou

Machine learning, big data and automation

Bulk carrier vessel tracking automation – the Dalrymple Bay use case 204
J Franke, P Wighton and W Russell

Implementing condition-based wear surface management 225
P Velletri and N Gaylard

Application of a reinforcement learning AI solution for optimisation of screening shuttles control 237
B Versiani, A Gooch, A Höreth and E Duggan

Mining

Fused sensors for slope deformation monitoring – considerations for iron ore mines 249
M Elmouttie and P Dean

Managing continuous improvement of Mine to Mill begins with measurement 260
J Loeb, P Cameron, R Ramanathan and H Ingham

Microseismic monitoring for open pit slope stability and rock fall detection 269
X Luo, Y Duan, M Elmouttie and P Dean

Improving compliance in mining through an effective geoscientific information management framework 276
S Mundell, A Atkins and S van de Water

Dealing with uncertainties on mining equipment fleet planning and usage 284
I R Souza

New equipment and processes

Development of a rail-running pipe conveyor for the iron ore industry 291
M Carr, C Wheeler, M Lurie and B Chen

Development of a remotely operated robotic mechanism for accessing and removal of metal tramp from primary gyratory crushers 306
R Costa, A Alves, L Ono, E Nunes, D Jacobson, H Lemos and H Delboni Jr

Efficiency improvement of iron beneficiation plant by special fine particle separator 314
M Lak, A Haratian, S Haji, R Amiri and M Asghari

Breakthrough in elliptical motion screen trial delivers significant performance gains 329
D Teyhan and J Kirsch

Online and downhole assay measurement

Real time phosphorus analysis using GEOSCAN on belt analysers at Assmang Khumani Mine in the Northern Cape 342
L A Balzan and F Nieuwenhuys

Advances in downhole assay measurements and calibration techniques 351
J Market, C Simpson, H Rossiter and P Jeanneau

Ore characterisation and geometallurgy

Transformation of automated optical image analysis software Mineral4/Recognition4 to Mineral5/Recognition5 374
E Donskoi, A Poliakov and K Vining

Liberation characteristics of comminuted ore types of the Per Geijer iron-oxide apatite deposits 391
P Krolop, K Niiranen, S Gilbricht and T Seifert

Mineral chemistry of iron oxides in the Leveäniemi iron ore deposit in Northern Sweden 406
A Larsson and K Niiranen

Spatial distribution of major, minor and trace elements in iron ores, using micro-XRF technology 417
N J Potter, J M F Clout and N W Brand

Processing and beneficiation

Efficiency improvement of Jalal Abad beneficiation plant by concentrate quality enhancement and tailings recovery 429
M Asghari, A Haratian, S Haji, R Amiri and M Lak

An innovative application of gravity separation technology to beneficiate ultrafine iron ore 443
M Hasan, D Pepper, J Lyons and C Vadeikis

Dry concentration of low-grade magnetic iron ores 453
J R Kelly and C S Kelsey

Molecular modelling applied to the flotation of iron ores 463
J Lainé, C Veloso, A C Araujo, Y Foucaud and M Badawi

REFLUX® versus hydraulic classifier – a comparative analysis for hematite concentrate cleaning 477
B Légaré, F Lavoie, K Bourassa and E Bouchard Marchand

Processing options for removal of silica and alumina from low-grade hematite-goethite iron ores 490
V Nunna, S P Suthers, M I Pownceby and G J Sparrow

Where DEM and SPH collide – wet screening optimisation with numeric tools 507
J Plinke

Testing and modelling of diverse iron ore slurries for pipeline friction and pump head derate 514
R Visintainer, A Sellgren, V Matoušek and G McCall

Project development and optimisation

Reproduction of inequality constraint between iron and silica for accurate production scheduling 531
S Abulkhair, N Madani and N Morales

Improved sustainability through WHIMS Plant addition at Roy Hill 542
C Jenkins, S Lozyk, J Jasper, Y Suryaputradinata and M J Hartmann

Positive influence of WHIMS concentrate on the sintering performance of Roy Hill fines 555
J R Manuel, L Lu, N A Ware, S Hapugoda, B D McDonald and X Cao

CITIC concentrate performance in pelletising and sintering 565
L Y Yang and Z Wang

Sustainability and climate change

Sintering for emissions reduction 578
G S Beros

The production of green steel using Hismelt 588
N J Goodman

It never rains but it pours – improving extreme-rainfall resilience in Australia's iron ore regions 597
J H Hodgkinson and M Grigorescu

Lime magnetite pellets – an alternative iron ore feedstock for lower carbon footprint ironmaking 605
S Purohit, M I Pownceby, G Brooks and M A Rhamdhani

Solar processing of iron ores 613
S Purohit, M I Pownceby, G Brooks and M A Rhamdhani

Tailings

Design considerations for an iron tailings filtration plant and their conveying and disposal systems 623
J Barrera, S Ramirez, H Alvarez, L Perez and C Garrido

Iron ore tailings and value addition – a short review 638
K Hazarika and G Senanayake

Mining iron ore from tailings with minimal use of process water 654
Y K Leong

Processing of unsaleable ultrafines to potentially reduce the volume of iron ore tailings 661
E Mare

Technical marketing

Penetration behaviour of an initial sinter melt into substrates of different ore types 676
H Han, L Lu and S Hapugoda

Design of a sintering heat profile for accelerating oxidation of magnetite ore 683
Y Konno, T Takayama and M Matsumura

High temperature characteristics of different types of blast furnace ferrous materials 691
L Lu, A Edenton and S Hapugoda

Sinter analogues mineralogy by different heating conditions 700
T B T Nguyen, T Harvey, T Honeyands, L Matthews and D O'Dea

Analyses of pressure drop in high temperature zone during iron ore sintering 707
T Singh, S Mitra, D O'Dea and T Honeyands

Author Index 715
